

We are the source for electronic components

COMPANY PRESENTATION

SERVICES

We are an independent supplier of electronic parts and components with a worldwide network of suppliers and customers. Today we hold one of the most extensive levels in stock with over 70,000 articles in Europe. Thereby Pegasus Components offers you the ideal combination of procurement, stocking and engineering.

Our clients include all kinds of industrial companies and all sizes of commercial clients in a range of different industries worldwide. We also serve the international component trading sector. We comply with permanently high quality standards concerning the selection of our suppliers, delivery control and handling of electronic components.

OUR KEY SERVICES

- Procurement of **hard-to-find** products
- **Shortening of lead times** for urgently needed, allocated or hard-to-find components
- **Purchase** for **long-term deliveries** including call-off orders
- **Purchase** respectively successful **brokerage of your surplus stock**

ENGINEERING SERVICES

We offer alternative / special-purpose solutions and individual solutions to our customers (generally for hard-to-find, allocated or obsolete products).

ADDITIONAL SERVICES

Specific market research by order of the customer

In cooperation with external service providers we offer:

- Component inspections / Testing
